# The experts in swimming pool covers

## *Quality and Italian design*

**Abritaly** is a key player in the pool covers market, not only in Italy but also abroad.

With **over 40 years of experience** and a wide range of products (more than 45), Abritaly will help you to choose the best cover for your pool and accompany you **throughout the installation process**.

The quality of the materials, the patents, the after-sales service and the timeless style of design Made in Italy, make Abritaly one of the most qualified companies in the field of swimming pool covers.

## YOUR PROJECT IN 5 STEPS

-  Free on-site visit
-  An offer for a made-to-measure cover
-  Production of your bespoke project
-  Cover installation
-  After-sales service

## RESPECT FOR THE ENVIRONMENT

All Abritaly covers:

-  Heat the water in the pool naturally, without using electricity and those that are motorised are powered by solar energy.
-  Protect the pool water from external debris. Cleaner water drastically reduces maintenance and the use of chemical products.
-  Are designed to last for years, limiting waste and scraps.
-  Considerably reduce the environmental impact of transportation as all the logistics activities are grouped together.

# MINIMAL

Abritaly **Minimal** covers are specific for flat pools and have an essential, elegant design that impacts minimally on the surrounding environment.

THE ADVANTAGES OF MINIMAL COVERS

# MINIMAL

## COVERSEAL COVERS

A unique cover that is stylish, safe, and elegant. Coverseal is the new generation of pool covers.

The result of three years of research, this unique and highly technological product is unmatched on the market.

Available in various colours and models:

- **AUTOMATIC,**
- **SEMI-AUTOMATIC,**
- **MANUAL.**

Always perfectly tensioned, these covers do not accumulate water and allow you to walk on them.

An ECOLOGICAL product that does not need electricity since it is self-powered.

# MINIMAL

## COVERSEAL COVERS

# MINIMAL

## FLAT COVERS

This type of cover features modular, stackable or vertically juxtaposed panels, that slide manually or automatically, covering the entire surface of the pool, blending in with the pool and fitting in perfectly with the environment.

Easy to use, its attractive design appears even more elegant and neat even when the cover is open.

# MINIMAL

## ROLLER COVERS

Abritaly roller covers are extremely practical.

Thanks to the automated opening and closing system, each type of cover can be customised according to your needs without sacrificing on the simple and elegant design.

This is a very versatile type of pool cover that adapts perfectly to the shape of the pool, thanks to the variety of materials and colours available, as well as the possibility of choosing from the junior roller model with bench or the submerged version.

MINIMAL

ROLLER COVERS

## MINIMAL

### ULTRA-LOW TELESCOPIC COVERS

Abritaly telescopic covers are the ideal solution for those who would like an elegant and practical pool cover, completely rail-free.

Unlike normal telescopic covers, this is a particularly stylish model thanks to the discreet design and minimum footprint and also to the type of material used, which makes the cover completely transparent intensifying the colour of the water in the pool.

# MINIMAL

ULTRA-LOW TELESCOPIC COVERS

# BASIC

In designing the **Basic** line of covers, Abritaly has invested in comfort and efficiency. These models are in fact the most intuitive to use, whilst offering a wide selection of customisations.

THE ADVANTAGES OF BASIC COVERS

- 
- 
- 
- 
- 

LOW COVERS

LOW TELESCOPIC COVERS

# BASIC

## LOW COVERS

These covers are very versatile, a characteristic that is of the utmost importance for the team at Abrisity. Thanks to their reduced thickness, which still allows you to swim in the covered pool, they integrate perfectly into the environment, without modifying the design of the cover.

The PLUS models are the most resistant to snow and wind loads and so they adapt very well in mountainous areas. You can choose from a selection of removable low covers consisting of several modules (honeycomb or cristal) that can be lifted or stacked, allowing you to personalise the cover according to your needs or low sliding covers (honeycombed or cristal) that are rail-free and have various options.

# BASIC

## LOW COVERS

BASIC

## BASIC

### LOW TELESCOPIC COVERS

These telescopic covers are characterised by panels that slide one over the other, made of resistant and patented material that does not disturb the style of the surroundings.

Particularly convenient and functional, among the various options, Abritaly also offers a motorised version that allows to move all its modules by simply using a remote control.

Thanks to the sliding telescopic system it is possible to create doors and openings that best adapt to your preferences and to how you use your pool.

## BASIC

LOW TELESCOPIC COVERS

# COMFORT

The models in the Abritaly **Comfort** line create a charming sheltered space that favours a moment of relaxation by the pool.

THE ADVANTAGES OF COMFORT COVERS

## COMFORT

### MEDIUM HEIGHT TELESCOPIC COVERS

Comfort medium height telescopic pool covers are characterised by their simple and intuitive use, as well as for their airtight closure that protects the pool from various weather conditions, allowing the pool to be used all year round.

Motorised versions are also available.

COMFORT

MEDIUM HEIGHT  
TELESCOPIC COVERS

## COMFORT

### SEMI-HIGH COVERS

Comfort semi-high pool covers are characterised by resistant materials, a unique lightweight structure and by the added value they bring to your home.

All Abritaly covers are equipped with cutting-edge technology, allowing them to be operated remotely.

Various models are available, such as the semi-high honeycombed, motorised honeycombed, cristal and motorised cristal.

# COMFORT

## SEMI-HIGH COVERS

# RELAX

The models in the Abritaly **Relax** line completely cover and protect the pool, offering a pleasant space in which to spend relaxing moments in and out of the pool.

THE ADVANTAGES OF RELAX COVERS

- 
- 
- 
- 

# RELAX

## ALUMINIUM COVERS

Relax aluminium pool covers are particularly light but equally resistant structures.

Owing to the great versatility of this material, sectional structures and various thicknesses can be produced.

A sturdy structure thanks to the great strength and resistance of the stainless-steel connection plates and the steel M8/A2 fixing screws.

# RELAX

## WOOD COVERS

Relax wooden pool covers are suitable to lend a certain elegance in your own garden.

This material has been used successfully in the building industry and in almost all public swimming pools, allowing to blend aesthetics, solidity and durability.

Wood also allows to customise the structures needing particular adjustments.

## RELAX

### EXTRA-LARGE COVERS

The solution adopted by tourist facilities and by those who wish to have a space dedicated to relaxation, sport and fitness or an outdoor lounge.

Abritaly's experience and know-how allow us to manage large-scale projects. Camping sites, hotels, B&Bs, restaurants have already relied on us to cover their 25 m wide pools.

The use of tempered safety glass is a great advantage since this material perfectly complies with the regulations in force for public swimming pools and the relevant fire regulations.

## BIOCLIMATIC PERGOLA

THE ADVANTAGES OF A BIOCLIMATIC PERGOLA

## PERGOLA

# BIOCLIMATIC PERGOLA

### WORKING PRINCIPLES

With open blades, it lets the natural light in and it helps the ventilation.

With closed blades, on the contrary, it provides shade; it protects from the sun and prevents the heat and shine.

The pergola is equipped with **ADJUSTABLE BLADES** useful for:

- **SHADING**
- **VENTILATING**

Position of the blades

## LIGHT CONTROL

The sun rises. The blades of the pergola open at 90° in order to let the light in.

The blades close in order to provide shade and allow the environment to keep cooler temperatures.

The sun sets. Adjustment of the side blinds and progressive opening of the blades.

At choice.

## CUSTOMISATION

Completely customisable and tailor-made. Wide choice of models, colours, optionals, blinds and led lights.

# RETRACTABLE ROOF PERGOLA

THE ADVANTAGES OF A RETRACTABLE ROOF PERGOLA

PERGOLA

# RETRACTABLE ROOF PERGOLA

## AN OPEN-SKY TERRACE

It is the first panoramic bioclimatic pergola with retractable roof. Designed following the same principle of a car’s sunroof, it frees the space and gives you light, providing you with 365 days of comfort.

The retractable roof pergola allows natural ventilation and a smart shade management in all seasons.

## FIXED ROOF PERGOLAS

THE ADVANTAGES OF A FIXED ROOF PERGOLA

## PERGOLA

# FIXED ROOF PERGOLAS

### 100% MADE-TO-MEASURE

The pergola can adapt to all types of homes and styles. It can be combined using different solutions to create a cosy and protected space. It is designed to evolve with time, according to your needs.

- WIDE CHOICE OF ROOF FILLING
- OPTIONAL LED LIGHTING
- OPTIONAL GLASS WINDOW FOR THE FAÇADE
- MODERN DESIGN WITH PROTRUDING ROOF EFFECT

## PERGOLA

# FIXED ROOF PERGOLAS

### 100% WATERPROOF

The fixed roof pergola is equipped with an assembly system that guarantees perfect waterproofing of the roof and real protection against bad weather.

It is also possible to equip it, even at a later time, with glass windows or profiles without thermal bridges, transforming it into a veranda-winter garden.

## SHAPES

### STRAIGHT

The straight shape is the original pergola shape par excellence. Its linear structure adapts easily to the existent structure.

### ANGULAR SHAPE

With/without cut corner, the angular shape pergola gives a more modern character. It fits every house style.

### HALF-SUN SHAPE

With/without cut corner, the half-sun shape pergola is more elaborate and it combines very well with traditional style houses.

## CUSTOMISATION

Completely customisable: led lights, materials, frames, blinds.

Colours

## FIXED ROOF PERGOLA

### ROLLING SHUTTERS OPTION

#### THE ROLLING SHUTTER PROTECTS THE GLASS ROOF IN ALL SEASONS

A pergola with glass roof is the ideal structure to maintain the natural light, but also the one that enhances the greenhouse effect and the heat production under the pergola. Easy to use, it is remote-controlled.

## FIXED ROOF PERGOLA

### SAGEGLASS® OPTION

SageGlass® is available also for the roofs of pergolas, so to create a perfectly bioclimatic structure.

Being more efficient than a traditional solar control glass, SageGlass® changes colour becoming darker or lighter accordingly to the need of light control, in order to prevent shine and reject excessive heat, with no need for blinds or curtains.

The light colour is transparent and lets the natural light in, it is useful to avoid changes in the light in the house. The dynamic management assures absolute comfort in your terrace.
